15 / Original review notes and source exceptions

Complete analysis | Explicit 15-row transaction previews | Detail amounts INR unless stated

SOURCE EXCEPTION
Haryana February 2026 displays FILED but has no ARN, ARN date or taxpayer name. Filing date remains unavailable; the document is not treated as independently verified filing evidence. State breakdown is by GST registration, not buyer location. Gross declarations may include inter-branch supplies.

Buyer/supplier concentration, HSN, party reconciliation and export-only ratios need GSTR-1/GSTR-2B or invoice ledgers. ITC cannot establish purchase turnover.

74 GSTR-3B documents | April 2025-July 2026 | Five registrations | INR crore unless stated | Registration-state scope

EVIDENCE-BASED SWOT
Strength: revenue and PAT growth. Weakness: rising debt, receivables and inventory; negative FY2025/26 operating cash flow. Opportunity: validate collections and working capital. Threat: financing dependence and differences in source account coverage. No bureau report was supplied; no credit score or sanction recommendation is inferred.

SOURCE TOTAL EXCEPTION
Entered EMI rows total INR51.32 lakh/month. Printed total INR3.23 lakh includes numeric cells only and misses text-formatted amounts.
LC / derivative limits are not annual funded debt. Missing EMI stays blank.

BASIS NOTE: FY2024 CFO includes short-term borrowing movements. FY2025 is restated Ind AS; the older net-worth certificate uses a different basis. Projected CMA excluded.

REQUIRED FOR PARTY-WISE RECONCILIATION
Customer ledger with GSTIN, invoice/date, gross amount, opening receivables and receipt allocations; GSTR-1 B2B/export tables; verified bank-name aliases. For suppliers, add GSTR-2B and purchase ledger.
Inter-registration GST elimination and June 2026 Union 0102 statement coverage also need verification. August bank statements are partial and August GST is not supplied.

Missing party GST values stay unavailable. No zero-valued party GST amounts, fuzzy name matches or artificial party variances are generated.

Availability-based comparison | April 2025-July 2026 | INR crore | Account and registration coverage differs by month

COMPARISON LIMITS
This is an availability bridge, not full entity reconciliation. Earlier months have fewer bank accounts and four GST registrations. Telangana records start Oct 2025.

GST can include branch transfers. Bank cash can include prior-period collections, advances, finance and unidentified internal transfers.

15 / Original review notes and source exceptions

Complete analysis | Explicit 15-row transaction previews | Detail amounts INR unless stated

All 25,558 raw rows passed within-statement running-balance checks. Reciprocal UTR transfers are confirmed; ownership narration remains a candidate. Return entries are not distinct failed-payment events.

June schedule limits are not applied to earlier months. Karnataka statements, and Kotak/Union CC limits, are absent. A blank statement balance means no matching 30 June entry. Different source balances are preserved for review.

16 / Evidence, interpretation and source mapping

Complete analysis | Explicit 15-row transaction previews | Detail amounts INR unless stated

- ZIP inventory: 164 source files, comprising 163 PDFs and one loan-obligation workbook. SourceInventory.json maps short source IDs to original file names and folders.
- 81 bank PDFs covering seven accounts. All 25,558 raw transactions pass consecutive running-balance checks within each statement. After removing 378 cross-document overlap rows, the model contains 25,180 transactions. Genuine repeated entries within a statement are preserved.
- Bank transaction dates range from 1 April 2025 to 24 August 2026. Earlier coverage is mainly Kotak; other accounts begin later. BOI records start April 2026. August is partial; Union 0102 June coverage ends 17 June in the supplied file. Missing account periods are not assumed to be zero activity.
- 74 GSTR-3B documents across Gujarat, Haryana, Maharashtra, Telangana and Uttarakhand. Four registrations begin April 2025; supplied Telangana documents begin October 2025. GST ends July 2026.
- Haryana February 2026 displays FILED but lacks the ARN, ARN date and taxpayer name. The filing date remains blank and the document is flagged as unverified evidence rather than declared unfiled.
- The 30 June 2026 loan sheet has 32 facilities. Limit and outstanding row sums reconcile to the source totals: INR234,07,71,621 and INR182,36,51,197. Entered EMI rows total INR51,31,667, while the source printed total is INR3,23,308; that printed total omits text-formatted amounts. Missing monthly amounts remain blank.

Interpretation and evidence gaps

- Adjusted BTO is a candidate, not verified sales. It excludes identified own-account credits, loan-disbursement candidates and return markers. Reciprocal UTR matches confirm a subset; ownership narration alone is clearly labelled as candidate. Unidentified financing/transfers may remain.
- Return counts count narration entries, not unique failed-payment events. Loan/cash/penal classifications require source narration review. Parties are based on statement names; no fuzzy identity merges are made.
- GST state charts show registration-state declarations, not buyer-state revenue. GST can include inter-registration/branch transfers. No branch-transfer or group elimination is possible from GSTR-3B alone.
- Zero-rated supplies are not independently proven exports: an export/SEZ split is absent. ITC does not establish purchase turnover. Buyer/supplier shares, HSN and party-wise reconciliation need GSTR-1, GSTR-2B and invoice ledgers.
- The 16-month reconciliation is an availability comparison, not full entity reconciliation. Coverage differs across months, and cash, booked supplies, taxes, advances and old receivable collections differ in basis. The resulting gap is not a debtor balance or proof of unexplained turnover.
- CC utilisation uses the obligation schedule's 30 June 2026 limits and outstanding only; those limits are not applied retrospectively. Source schedule and available statement closing balances are shown separately, including differences. Karnataka statements and Kotak/Union CC limits are absent.
- Total financial debt includes current/noncurrent borrowing balances plus lease liabilities. The literal PDF adjusted debt/equity formula double counts unsecured borrowing and is labelled accordingly. Tangible net worth deducts intangibles from equity.
- FY2024 source operating cash flow includes INR7,509.34 lakh of short-term borrowing movements. Later Ind AS cash flows classify borrowings under financing; the chart and OCF/interest ratio require this basis caveat.
- FY2025 original accounts and the older net-worth certificate use a different basis from the restated FY2025 comparative. The dashboard does not substitute the certificate's INR12,731.85 lakh into the restated equity/TNW calculation.
- A source rounding difference of INR1,000 is retained in the FY2025 balance-sheet total check; no balancing entry is invented. FY2026 PAT + tax differs from printed PBT by INR1,000; formula calculations use the PDF's PAT-based definition.

16 / Evidence, interpretation and source mapping

Complete analysis | Explicit 15-row transaction previews | Detail amounts INR unless stated

- Gross annual principal repayments, eligible drawing-power inputs, promoter personal net worth and invoice-level ageing are not established. Net borrowing cash flows and later EMI schedules cannot replace annual DSCR debt service. No CIBIL/CMR report was supplied; no score is inferred.
- Projected CMA data is kept separate from audited actuals and is not used to manufacture missing historical values.
